Covid-19 Vaccination Campaign in Germany

The data used here were provided by Robert Koch Institute and the German federal ministry of Health.

These institutions publish the datasets and some analysis on the page impfdashboard.de.

Setup

Imports

```
In [1]: # standard library
import datetime
import math
In [2]: # third party
import numpy as np
import pandas as pd
import matplotlib.pyplot as plt
import requests
```

Date this Notebook was run

```
In [3]: today = datetime.datetime.today().strftime('%Y-%m-%d')
today
Out[3]: '2021-04-30'
```

Set Defaults

```
In [4]: # style like ggplot in R
plt.style.use('ggplot')

In [5]: # Avoid cutting off part of the axis labels, see:
    # https://stackoverflow.com/questions/6774086/why-is-my-xlabel-cut-off-in-my-matplotlib-plot
    plt.rcParams.update({'figure.autolayout': True})
```

localhost:8888/lab 1/14

Get and Transform Data

```
In [6]: vaccination_data_permalink = 'https://impfdashboard.de/static/data/germany_vaccinations_timeseries_v2.tsv'
vaccinations = pd.read_csv(
    vaccination_data_permalink,
    sep="\t")
```

Drop unnecessary columns

14 dosen johnson kumulativ

Columns with names starting with 'indikation' will not be analyzed as the data providers stopped updating them.

```
In [7]: # No analysis of indication planned:
    cols_to_drop = vaccinations.columns[vaccinations.columns.str.contains('indikation_')]
    vaccinations.drop(columns=cols_to_drop, inplace=True)

In [8]: # Convert datatype of date column
    vaccinations.iloc[ : , [0]] = vaccinations.iloc[ : , [0]].apply(pd.to_datetime)
```

Show Data

```
vaccinations.info()
In [9]:
        <class 'pandas.core.frame.DataFrame'>
        RangeIndex: 124 entries, 0 to 123
